#### Introduction

GV-LPC2211 is a 2 MP color network camera designed for recognition of reflective license plates on vehicles traveling up at 120 km/h (75 mph) or less with extreme temperatures (-30°C  $\sim$  50°C / -22°F  $\sim$  122°F) resistance. It is weather proof (IP67). Equipped with a Super Low Lux CMOS image sensor, the camera is capable of displaying a color live view at near darkness. Its multiple LEDs and build-in intelligent IR provide clear license plate for two lanes under low-light conditions at a maximum IR distance of 20 m (65.6 ft). The motorized varifocal lens take the advantage of its motorized focus / zoom in that the user can remotely adjust the focus and zoom through the Web interface. The camera also allows automatic and precise control of exposure using its P-iris, producing images with better clarity and contrast.
