

UNITYIS CLOUD BASED SOLUTION

UnityIS is a powerful cloud solution for all your physical security needs. An evolved product at your fingertips, UnityIS leverages the expertise and thoughtful design that is intuitive and complete, for any vertical, any size. With both cloud and on-premises options, you have the flexibility and the scalability to adjust to your business.

UnityIS managed in the cloud offers complete access management. Whether you are in the office or off-site, connect to UnityIS from any Internet connected device, anywhere. With a full range of features, access control has never been so easy.

- ✓ Manage access from anywhere. Instantly add a new user, update an existing record, assign advanced access control attributes.
- ✓ View real-time events as they happen in the system.
- ✓ Be alerted to real-time system alarms.
- ✓ Monitor and control doors from anywhere.
- ✓ Graphic Maps for video and access control devices.
- ✓ Advanced reporting made easy. Just select, generate and share reports.

With UnityIS managed in the cloud, there is no on-premises software to load. No need to worry about maintenance, back-ups and up-time. We will handle that for you! With all the benefits, you can stay focused on your business.

BENEFITS:

- ✓ 99.9% Up-Time
- ✓ Bank Level Encrypted Data Communication
- ✓ Anywhere Access using a Browser including Mobile Devices
- ✓ Software Maintained and Managed in the Cloud that can be Accessed 24/7
- ✓ Daily Backups
- ✓ Automatic Software Updates
- ✓ Pre-Programmed Open Hardware for Plug and Play Installation

UnityIS managed in the cloud is offered in a simple subscription model, monthly or annual, with no upfront license fees. With unlimited access to UnityIS, you simply pay for the number of doors. With pre-programmed Authentic Mercury utilizing POE+, installation has never been so easy. No gateway needed.

UnityIS has the unique ability to integrate to the industry's most trusted brands of hardware systems for access control, intrusion, fire and video.

Just a few of the features:

- ✓ **Advanced Access Control** - Multi-credential support, unlimited first-man in rules, VIP Access, unlimited cardholders, advanced search functions, customizable commands.
- ✓ **Desktop Mode** - Manage and organize all applications in one Desktop.
- ✓ **Global I/O Linking** - Link system events to execute action sequences with like and disparate systems using advanced programming capabilities to invoke multiple actions.
- ✓ **Fully Integrated Modules** - Modular design with native ID-Badging module for badge design and creation, native report manager with robust and customizable reporting capabilities, muster reporting, thick and thin clients, occupancy control.
- ✓ **Interactive Alarm and Graphic Maps** - Plot and control system devices onto customizable layers. Interactive alarms with counters, configurable alarm acknowledgements and priority settings. Email alerts to defined recipients.
- ✓ **Granularity** - Assign specific user permissions and profiles to different levels of data access and management throughout the system.
- ✓ **UnityIS on-premises is purchased as a one-time perpetual license.** Just add-on additional doors and modules as needed. Receive unlimited upgrades and continued technical support with active maintenance after the first year. The benefits to you are immense.

UNITYIS ON-PREMISES OFFERS THE MOST COMPREHENSIVE SECURITY SOLUTION.
