EST-M04
Microphone Station (4 buttons)

Overview

The EST-M04 is a 4 button analog microphone with built in gong, push to talk and bi-color LED indicating the ready-to-speak status.

To operate the device first select the Zones by pressing designated buttons and then press MIC ON button, the status LED will switch from red (not ready for broadcast) to steady green light. In the event of an active built in gong, the status LED will turn green once the gong has ended. When finished transmitting the message release the MIC ON button to deactivate the gooseneck mic.

Details

- Solid construction
- Zone configuration buttons at front panel with LED
- Microphone on/off button with LED
- Flexible microphone neck
- Microphone volume control at rear panel
- Gong feature at rear panel with volume
