Access Sentry Door Entry System

LEM-1DL is ideal for businesses, providing calling and communication from a secured door to an inside station. Once a visitor's identification is verified, an electric strike can be activated from the inside station.

FEATURES:

- Call tone from door and hands-free communication
- Push-to-talk door answering at inside station
- Door release control (normally open contacts)
- Use any LE-series sub or door station
- Call tone and communication volume controls
- Wall or desk mountable master station
- AC (PT-1210N) or DC powered (PS-1225UL)

Single Master Open Voice System

LEM-1 and LEM-3 are compact master stations that can answer and communicate with one, or up to three remote stations. Indoor sub stations or door stations can be used. Ideal for monitoring a room or where simple hands-free communication is required.

FEATURES:

- 1- and 3-call master stations
- Subs call with tone (and LED on LEM-3)
- Push-to-talk at inside station to answer sub
- Hands-free communication at sub
- Use any LE-series sub or door station
- Communication volume control
- 2 conductor homerun wiring from subs
- 6V DC powered (SKK-620)
