Electronic Locking Solutions

visiOnline
by VingCard®

VISIONLINE by VingCard offers the ideal solution for the most demanding properties.
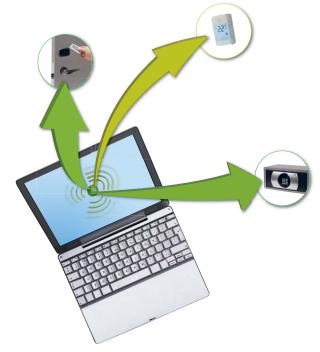

Standalone electronic locks operating in online mode are based on the Zigbee high security open platform (Radio Frequency (RF-online)) providing you with:

- More Security and Control
- More Services to your Guests
- More Efficient and Cost Effective Hotel Operations
- More Efficient Front Desk Operations
- More Efficient Engineering and Maintenance
- ...And Less hassle...

VISIONLINE is much more than "just" electronic locks through its wireless online features.

MAIN BENEFITS FOR DIFFERENT AREAS OF YOUR PROPERTY

1) Remote guest card cancellation: Guest cards can be immediately cancelled without walking to the lock to reprogram it or encode a new card.
2) Remote master card cancellation: Master cards can be immediately cancelled without walking to reprogram all the electronic locks.
3) Wandering intruder report/alarm: Keycards can be automatically cancelled if someone is randomly using them in different locks.
4) Door ajar alert: A message is sent to server that a door is not closed properly.
5) Extended stay without visiting reception: Guests' access to their rooms can be extended automatically from reception, to avoid guests having to come to reception to re-encode the keycard.
6) Remote "change my room" function: Guest can automatically be assigned a different room from reception, without needing to come to reception to re-encode the keycard.
7) Online passage mode activation: Locks can be remotely configured in passage mode from VISIONLINE server.

8) Live tracking of card users: You can follow up individual keycard tracking throughout the property (where the card owner has been).
9) Auto check-out of guests: Guest keycards will not work once checked-out (instead of working until standard check-out time).
10) Block cards per user and per section: You can remotely block keycards the access to specific areas without walking to reprogram the locks.
11) Remote audit trail: Online events from the lock are sent to the VISIONLINE server so you do not have to walk to the locks to download the audit trail.
12) Remote low battery status: You can remotely identify the locks that have a low battery, instead of walking to each lock to check it.
13) Insert maintenance report cards: By maid inserting maintenance report cards into the lock, it will remotely inform VISIONLINE reception that room needs maintenance.
14) Auto SMS/e-mail alert option: Lock actions may be sent to person in charge automatically.
15) ... and many more.
